PROFESSIONAL SUMMARY

Cybersecurity and Computer Science undergraduate specializing in cloud technologies, backend engineering, and security operations. Experienced in Vulnerability Assessment and Penetration Testing (VAPT), SIEM monitoring, REST API integration, and scalable application development. Proficient in Python, JavaScript, React, Node.js, Linux, and Microsoft Azure services. Skilled at identifying security risks, optimizing workflows, and engineering cloud-ready solutions with strong analytical and problem-solving capabilities.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL, C/C++

Web Development: React 18, Node.js, REST APIs, HTML5, CSS3

Cybersecurity: VAPT, SIEM, IAM, OWASP Security Testing, Threat Analysis, Web Application Security

Security Tools: Nmap, Burp Suite, OWASP ZAP, Splunk, Postman

Cloud Platforms: Microsoft Azure, Oracle Cloud Infrastructure (OCI), Azure DevOps, Supabase

Networking: TCP/IP, Socket Programming, Port Enumeration, Network Reconnaissance

Developer Tools: Git, GitHub, Linux, Power BI

EDUCATION

Parul University, Vadodara Bachelor of Technology in Computer Science and Engineering CGPA: 7.5 / 10	2023 – 2027
---	-------------

Vapi Public School (ISC) Higher Secondary Education (PCM) – 79%	2023
---	------

Vapi Public School (ICSE) Secondary Education – 89%	2021
---	------

EXPERIENCE

Cybersecurity Intern Hacktify Cybersecurity	Feb 2025 – Mar 2025
--	---------------------

- Executed Vulnerability Assessment and Penetration Testing (VAPT) activities across 10+ web application modules and internal services.
- Identified and documented 20+ security vulnerabilities including authentication flaws, exposed endpoints, insecure headers, and configuration weaknesses.
- Investigated HTTP requests, session handling, and attack surfaces using Burp Suite to validate security findings.
- Delivered remediation reports that improved vulnerability tracking and security resolution workflows.

PROJECTS

TrainWise AI-Powered Fitness and Nutrition SaaS Platform	2026
---	------

- Architected a scalable SaaS platform using React 18, Node.js, Supabase, and NVIDIA NIM APIs supporting AI-driven recommendations.
- Engineered personalized workout and nutrition generation workflows capable of processing dynamic user inputs in real time.
- Reduced backend response latency by approximately 35% through optimized API calls and efficient state management.
- Implemented secure authentication, API rate limiting, and Row-Level Security (RLS) to strengthen platform protection.

- Designed analytics dashboards featuring fatigue heatmaps, progress tracking, and adaptive performance insights.

Port Scanner | Python-Based Network Security Utility

2025

- Developed a multithreaded TCP port scanner capable of scanning 100+ ports within seconds using Python socket programming.
- Automated banner-grabbing and open-port enumeration workflows for faster reconnaissance and network analysis.
- Improved scanning efficiency by implementing concurrent socket handling and timeout optimization techniques.
- Applied TCP/IP networking concepts to analyze exposed services and validate connectivity across test environments.
- Repository: github.com/garvit835/PortScanner

WebScore | OSINT Website Reputation Analyzer

2025

- Built a browser-based OSINT analysis platform integrating WhoisXML and Google Safe Browsing APIs.
- Processed domain reputation and threat intelligence data to evaluate website trust indicators in real time.
- Optimized frontend performance by reducing unnecessary API requests and improving client-side rendering efficiency.
- Structured a lightweight JavaScript-based architecture delivering faster page load times and streamlined analysis workflows.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Security Operations Analyst Associate (SC-200)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Microsoft Certified: Power Platform Fundamentals (PL-900)
- Google Cybersecurity Professional Certificate
- Oracle Cloud Infrastructure Certifications

LEADERSHIP AND ACTIVITIES

- Served as Chairperson of the IEEE Parul University Student Branch and contributed to increasing student membership participation by approximately 95% through technical events and community engagement initiatives.
- Coordinated workshops, technical sessions, and collaborative activities focused on cybersecurity, cloud computing, and emerging technologies.
- Contributed to The Hackers Meetup documentation team by organizing event records and maintaining technical documentation workflows.
